The gender gap in Japan is very large, and one of the reasons for this is the small number of female leaders in various fields. At this conference, Hedwige Nuyens, Chair of European Women on Board (EWOB), and Caroline Farberger, Chair, Board Executive, Investor, will discuss the current conditions and issues with which female leaders are struggling, particularly in for-profit and non-profit organizations. Ms. Nuyens and Ms. Farberger will talk about how to encourage women and develop various policies to nurture female leaders. They will introduce not only good practices but also ongoing issues on this issue in Europe and advise Japan and Asian regions.

We would like to encourage the active exchange of various opinions between the speakers and participants. We welcome as many participants with different backgrounds as possible, including students and young people.
